LAM PRIMARY EXAMINER	

U.S. Patent and Trademark Office PTOL-37 (Rev. 1-04) Art Unit: 2816

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The following changes have been made to the subject application:

Specification:

Page I, line 4, after "2002,", -- now USP 6,650,158,-- has been inserted.

Claim 81:

Line 8, "the output" has been changed to --the Q output--.

Claims 88, 95, 102, 109, 117, 124, 131, 138, 145, 153, 162 and 171:

Line 7, "the output" has been changed to --the Q output--.

The changes have been to update the information on the US application 10/076,058 and to provide proper antecedent basis for the term "the Q output" and to place the application in a condition for allowance.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: the amendment filed 11/19/2004 has overcome the technical deficiencies and the prior art of record. The prior art of record fails to teach or fairly suggest first ferroelectric capacitor coupled between the Q output and ground, a second ferroelectric capacitor coupled between the complementary Q output and ground, and a third capacitor coupled between the Q and complementary Q outputs as called for in claims 81 and 117, first ferroelectric capacitor coupled between the Q output and ground, a second ferroelectric capacitor coupled between the complementary Q output and ground, and

Application/Control Number: 10/613,427

Art Unit: 2816

third and fourth serially coupled matched ferroelectric capacitors coupled between the Q and complementary Q outputs as called for in claims 88 and 124, means for selectively coupling the ferroelectric capacitor circuit to the Q and complementary Q outputs as called for in claims 95 and 131, a pass gate circuit for selectively coupling the ferroelectric capacitor circuit to the Q and complementary Q outputs as called for in claims 102 and 138, an internal drive isolation circuit as called for in claims 109 and 145, J input, k input, first NAND gate, clock signal, second NAND gate as called for in claim 153, J input, k input, first NAND gate, clock signal, second NAND gate and internal drive isolation circuit as called for in claim 162, k input, first NAND gate, clock signal, second NAND gate, clock signal, second NAND gate and a slave JK flip flop as called for in claim 171. Therefore, claims 81-179 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan T. Lam whose telephone number is 571-272-1744. The examiner can normally be reached on Monday to Friday (7:30 am to 6:00pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, TIMOTHY P CALLAHAN can be reached on 571-272-1740. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
